

## BLEND-TOOL NFG—32

**BLEND-TOOL NFG-32** lubricant is a special blend of catalytically hydrogenated, solvent refined, paraffin base stocks with very low pour points. Special additives have been blended with the base stock to enhance its physical properties and provide the following benefits:

- Emulsification of the moisture in the compressed air to prevent rust;
- Tough extreme pressure properties to protect tools from seizure and wear and provide good adherence to wet working surfaces;
- Resistance to oxidation to prevent lost time due to gumming and varnishing;
- Proper atomization for good lubrication and proper control of fogging.

BLEND-TOOL NFG-32 is an excellent choice for small drills, grinders, vibrators, wrenches, screwdrivers, air nailers and staplers, air cylinders, motors, valves and chucks.

PRODUCT DATA SHEET

BLEND-TOOL	32
ISO Grade	32
Viscosity @40°C, cSt @100°C, cSt	32.0 5.50
Viscosity Index	165
Flash Point, °F (°C)	430 (220)
Pour Point, °F (°C)	-5 (-21)
