

## BLEND-TOOL NFG—68

**BLEND-TOOL NFG-68** lubricant is a special blend of catalytically hydrogenated, solvent refined, paraffin base stocks with very low pour points. Special additives have been blended with the base stock to enhance its physical properties and provide the following benefits:

- Emulsification of the moisture in the compressed air to prevent rust;
- Tough extreme pressure properties to protect tools from seizure and wear and provide good adherence to wet working surfaces;
- Resistance to oxidation to prevent lost time due to gumming and varnishing;
- Proper atomization for good lubrication and proper control of fogging.

BLEND-TOOL NFG-68 is an excellent choice for large drills, frinders, vibrators, hand-held tools and jack hammers

PRODUCT DATA SHEET

BLEND-TOOL	68
ISO Grade	68
Viscosity @40°C, cSt @100°C, cSt	69.5 8.75
Viscosity Index	101
Flash Point, °F (°C)	430 (221)
Pour Point, °F (°C)	0 (-18)
