

# **COLD OVEN CHAIN APPLICATION GUIDE**

## **WHY USE HCFO, HCFO PLUS & OCL REGULAR?**

- Easy to Remix and Apply
- Cost effective
- Widely used by U.S. bakeries

## **HOW TO APPLY COLD OVEN CHAIN LUBRICANTS**

- Shut off all gas burners, pilot lights or any source of ignition.
- Oven temperature must be below 150° F (66° C) before lubricant application.
- Exhaust fans must be running.
- Steam dampers must be open before and during lubrication.
- Ventilation should continue until oven has been reheated to baking temperatures.
- Make sure that container is closed tightly when not in use.
- Store in a safe place.
- Do not dilute lubricant.
