

HOT OVEN CHAIN APPLICATION GUIDE

WHY USE HYBAKE SUPREME OVEN CHAIN LUBRICANTS?

- **Easy to Remix and Apply**
- **Reduces oven downtime for lubrication**
- **Widely used by US and overseas bakeries**
- **Formulated with high-purity, ultra-fine natural flake graphite**

HOW TO APPLY HOT OVEN CHAIN LUBRICANTS

- **Apply at oven temperatures between 200° F (121° C) to 400° F (204° C)**
- **Shut off all burners in immediate area of lubrication/application.**
- **Exhaust fans must be running.**
- **Steam dampers must be open before and during lubrication.**
- **Keep heat on in oven until all carrier is driven off.**
- **Ventilation should continue until all vapors are exhausted.**
- **Make sure that container is closed tightly when not in use.**
- **Store in a safe place.**
- **Do not dilute lubricant.**
