SYN-GAS LRC 68

SYN-GAS LRC 68 is especially designed and well suited for use in landfills, enhanced oil recovery, refineries and chemical process plants where there is a need for lubricants to be inert to reactive and corrosive gases. SYNGAS-LRC 68 is 100% PAO and does not contain sulfur, or include aromatics or alkenes found in petroleum products. It does not include esters and works well in the presence of acidic or corrosive gases including hydrogen sulfide, carbon dioxide, chloride or sour gases. In addition to resisting wear, SYNGAS-LRC 68 protects equipment from the harmful effects of acids and water while resisting deposit formation and extending equipment life. Extremely low vapor pressure results in very low carryover past the separator.

PRODUCT DATA SHEET

SYN-GAS LRC	68
ISO Grade	68
Molecular Weight	765
Viscosity @40°C, cSt @100°C, cSt	69.4 10.8
Viscosity Index	146
Flash Point, °F (°C)	510 (266)
Fire Point, °F (°C)	570 (299)
Pour Point, °F (°C)	-40 (-40)
Vapor Pressure 100°F 200°F 300°F	0.0001 0.0004 0.0015
