SYN-GAS PAGS 150

SYN-GAS PAGS 150 is a full synthetic polyalkylene glycol based gas compressor oil, formulated for use in enclosed gearboxes, bearings and rotary screw compressors that require the enhanced wear protection, thermal and oxidization stability afforded by polyglycol lubricant. The base stock resists dilution and thinning and provides viscosity stability through a wide temperature range as evidenced by the very high viscosity index. SYNGAS-PAGS 150 includes additives to inhibit rust and corrosion, as well as inhibiting hydrogen sulfide.

NOTE: Polyalkylene Glycol lubricants are not compatible with petroleum oils.
Do Not Mix.

PRODUCT DATA SHEET

SYN-GAS PAGS	150
ISO Grade	150
Viscosity @40°C, cSt @100°C, cSt	148 27.8
Viscosity Index	227
Flash Point, °F (°C)	505 (263)
Pour Point, °F (°C)	-49 (-45)
Density, g/ml, 60°F 100°F 185°F	1.0484 1.0321 0.9939
