

# NFG SYSTEM FLUSH

**SYSTEM FLUSH** is designed specifically for flushing circulating lubrication systems while the equipment is not under load. Its diester base and additives offer excellent dispersal and detergent attributes, making it ideal for flushing systems that may contain contaminants or lingering residuals of previous fluids that are incompatible with the replacement product.

As a flushing fluid, SYSTEM FLUSH is not intended to be used as a lubricant under load. It is meant to circulate through the lubrication system for approximately 15 minutes and drained while warm.

# PRODUCT DATA SHEET

SYSTEM FLUSH	
Specific Gravity	0.967
Viscosity @40°C, cSt @100°C, cSt	38 5.4
Viscosity Index	62
Flash Point, °F (°C)	435 (224)
Pour Point, °F (°C)	-44 (-42)
