

HYBAKE Complete

Description HYBAKE Complete an NSF Certified H1 premium hot oven chain lubricant. Formulated to provide excellent lubrication and oxidation resistance in the most demanding bakery ovens. Synthetic graphite provides the best lubrication and eliminates any nasty buildup that you may see with simple, graphite free lubricants. You need your oven chains to work hard - give them the lubrication they deserve.

**Advantages**

- Make FDA audits easier on yourself and the auditors, HYBAKE Complete is NSF H1 Rating allows for incidental food contact!
- Extremely fine particle size and rust inhibitors penetrate every part of the oven chain, stopping wear and tear before it starts. Rust inhibitor stops oxidation in its tracks!
- Ready to use out of the container – just brush, dip, or spray it on the oven chain.

Typical Properties

Solids Content:	11.5%
Primary Additive:	5 µm Synthetic Graphite
Carrier / Diluent:	Distilled Water
Brookfield Viscosity:	112 Centipoise [cP]
Freeze Point:	32°F

Application HYBAKE Complete should be mixed lightly before use. Lubricant is supplied ready to use, do not dilute.

Precautions Apply using a brush, roller, or airless spray equipment, if sprayed exhaust blowers and fans should be operating to prevent buildup of dust in equipment. Apply between 200°F and 400°F. Product may not dry thoroughly if applied at lower temperatures. Applying at higher temperatures could result in fire and smoke. Please refer to the product SDS for proper disposal and first aid instructions. Protect from freezing!

Shelf Life One year from date of shipment.

Packaging 5 Gallon Pails – inquire about other packaging options.
